PROFILE

IT professional with a Bachelor of Science in Information Technology and extensive experience coordinating complex operational, educational, and technology-enabled projects across higher education and international environments. Experienced in Linux systems administration, systems installation and configuration, technical troubleshooting, deployment, documentation, and stakeholder engagement. Demonstrates strong analytical, problem-solving, and project management capabilities, supported by continuous professional development in cybersecurity, networking, and emerging technologies. Adept at collaborating with diverse stakeholders, managing technical and operational processes, and delivering effective technology solutions in dynamic environments. Core competencies include Linux systems administration, systems installation and maintenance, technical troubleshooting, deployment support, workflow automation, stakeholder engagement, project coordination, and technical documentation.

TECHNICAL SKILLS

Systems Administration

Linux administration | System installation and configuration | SSH remote administration | System monitoring | Capacity planning | Backup and recovery

Infrastructure and Support

Software deployment | Release management | Applications support | Troubleshooting | Technical documentation

Databases and Security

MySQL & PostgreSQL | Rkhunter | Database administration concepts | Cybersecurity fundamentals | Access management | Security controls

Project and Service Management

Project management | Stakeholder management | Risk management | Process improvement

Technologies

Linux | Bash | SSH | MySQL | PostgreSQL | Microsoft Office | Microsoft Teams | Canva | Generative AI tools | Prompt engineering workflows

IT CERTIFICATIONS

- Cisco Networking Basics (in progress, expected 2026)
- Cisco Ethical Hacking (in progress, expected 2026)
- CS50 Introduction to SQL (in progress, expected 2026)
- Cisco Linux Essentials
- Cisco Introduction to Cybersecurity
- IBM Data Science Foundations Level 1
- IBM Big Data Foundations Level 1
- IBM Big Data Foundations Level 2
- IBM Hadoop Foundations Level 1
- IBM Blockchain Essentials
- IBM Apache Spark Level 1

PROJECTS

Linux Headless Server Management

Personal infrastructure project | 2026 – present

- Installed, configured, and maintained Linux server environments.
- Performed systems administration tasks, including user, permission, service, and package management.
- Configured secure remote administration using SSH.
- Conducted system monitoring, troubleshooting, and performance optimisation.
- Implemented backup, recovery, and security procedures.
- Configured firewall rules using UFW and implemented intrusion detection using Rkhunter.
- Performed capacity planning and routine system maintenance activities.
- Managed Linux services and system updates using Bash command-line tools.
- Configured and maintained system services using systemd.
- Performed log analysis, system diagnostics, and operational issue resolution.
- Produced technical documentation and supported software deployment and release activities.

AI-Assisted Workflow Development

Professional workflow optimisation project | 2025 – present

- Designed and implemented AI-assisted workflows for documentation, assessment development, and administrative processes.
- Applied structured prompting and validation techniques to improve workflow efficiency and output quality.
- Produced technical documentation and evaluated process improvements through iterative testing and stakeholder feedback.

IELTS Online Assessment Platform

Educational technology implementation project | 2024 – 2025

- Designed and implemented an online assessment workflow.
- Gathered user requirements and documented technical specifications.
- Managed deployment, testing and maintenance activities.
- Developed and executed SQL queries for data retrieval and management.
- Provided user support and troubleshooting.
- Coordinated stakeholder communication and project delivery.

Miro Word Counter

Workflow optimisation project | 2026

- Analysed user requirements and designed application functionality.
- Developed and tested a word-counting utility for Miro environments.
- Performed debugging, deployment and user support activities.
- Produced technical documentation and implementation guidance.

PROFESSIONAL EXPERIENCE

Freelance

Language Learning Specialist

Potchefstroom, ZA

Feb 2019 – Present

- Designed and delivered technology-enabled learning solutions using online platforms and digital tools.
- Managed customised online learning environments and supported end-user adoption of educational technologies.

North-West University

Educational Interpreter

Potchefstroom, ZA

Jan 2014 – Feb 2019 | Feb 2020 – Dec 2022

- Supported technology-enabled learning environments across multiple faculties.
- Provided end-user technical support and troubleshooting for digital learning platforms.

- Produced and maintained multimedia and technical documentation.
- Collaborated with academic stakeholders to implement educational technology solutions.
- Supported multiple academic departments within a complex institutional environment.
- Coordinated with academic and administrative stakeholders to deliver technology-supported educational services.

Freelance

English and Afrikaans Language Practitioner

Potchefstroom, ZA

May 2019 – Nov 2019

- Produced and validated approximately 25 hours of Afrikaans language data for machine learning model development and training.

EduStream Kazakhstan

Consultant/English Teacher

Astana, KZ

Feb 2019 – Jun 2019

- Delivered technology-enhanced educational programmes to diverse stakeholders.
- Facilitated professional development workshops and technical training.
- Conducted assessments and coordinated stakeholder engagement activities.
- Presented to audiences of up to 100 participants.

Study Innovations Kazakhstan

Assistant Director of Studies/Senior English Teacher

Astana, KZ

Jan 2010 – Dec 2013 | Aug 2014 – Jul 2015

- Managed operational projects involving scheduling, resource allocation and risk management.
- Coordinated stakeholders to deliver educational programmes and organisational initiatives.
- Developed operational procedures, documentation and training programmes.
- Delivered staff development workshops and organisational support activities.

Carnival Cruise Line

Casino Host/Events Manager

Miami, US

Jan 2007 – Dec 2010

- Managed events, budgets, inventory, and customer engagement activities in a high-volume operational environment.
- Coordinated large-scale promotional activities involving audiences exceeding 2,000 participants.

Peermont Global

Croupier

Klerksdorp, NW & Nelspruit, ZA

Jan 2004 – Jan 2007

- Maintained strict compliance with operational procedures, policies, and regulatory requirements.
- Demonstrated accuracy, attention to detail, and customer service excellence.

EDUCATION

North-West University

Bachelors of Science in Information Technologies (in progress, expected 2026)

Potchefstroom, ZA

Focus areas: Systems administration, networking, databases, operating systems, software engineering, and project management.

University of Cambridge

Certificate in Teaching English to Speakers of Other Languages (CELTA)

Almaty, KZ

International TEFL and TESOL Training

Teaching English as Foreign Language (TEFL)

Astana, KZ

ADDITIONAL CERTIFICATIONS

Learning to teach online | Elearning essentials: Instructional design | IELTS teacher training | Cambridge: Confidence 2 express yourself | Teaching English online | Crowd control | Designing online learning | Feedback and assessment | Supporting your students: Engagement, inclusivity and wellbeing | Developing the online learning experience

PROFESSIONAL STRENGTHS

Project coordination | Stakeholder engagement | Technical documentation | Risk management | Process improvement | Analytical problem-solving | Technical training and support | Continuous professional development
